Automat-it

LLM Selection Optimizer

Make the right LLM choice to accelerate growth

Stop wasting your runway on the wrong LLM

Choosing the wrong LLM causes startups to waste budget, slow MVP validation, and increase technical debt. "Model lock-in" and premature scaling risks are common issues.

LLM Selection Optimizer compares leading LLMs for you to find the right foundation model on Amazon Bedrock for your situation.

aws PARTNER Premier Tier Services

aws PARTNER AI Services Competency

Cut costs by up to 60%

Prove which model will yield the best ROI

Accelerate LLM adoption

How it Works

1

Audit

Automat-it's **AWS AI Competency team** evaluates your use case and proprietary datasets against the current LLM landscape

2

Test

We simulate your workload to measure real-world cost vs. performance.

Benchmarked across:
cost • latency • accuracy • task performance

3

Optimize

Receive a **Benchmarking Report** and data-backed recommendation to confidently deploy the model that maximizes ROI

Business Impact

Optimize Burn rate
Use right-sized models to avoid wasted spend

Faster Time-to-Decision
Skip trial-and-error cycles with standardized, reproducible benchmarks

Scalable Strategy
Avoid vendor lock-in with a flexible, growth-aligned strategy

Insights Before You Commit
Understand model response times, accuracy, and reasoning power before production

Seamless Stack Integration
Leverage Amazon Bedrock best practices and reference architectures for smooth deployment

About Automat-it

Automat-it is an all-in AWS Premier Partner and Managed Services Provider specializing in startups. Our team of seasoned cloud experts brings deep, hands-on expertise in AI, DevOps, and FinOps. Our benchmarking know-how empowers you to optimize performance and cost, accelerate time-to-market, scale faster, build smarter, and stay ahead in the age of intelligent automation.

Our **AWS AI Services Competency** means we have undergone rigorous technical validation and demonstrated successful customer implementations that meet AWS's high standards for security, reliability, and operational excellence.
